

## **Wolfstorm Reflection**

**What I liked about Wolfstorm is that it had real facts about Hitler, The cockelshell heroes and WW2 in it which made the book sound quite interesting and all the character's adventures were certain to be amazing and just how the book was written itself was a piece of imagination and art. It can give interest and knowledge to the readers of this fantastic book. Who cares if it is 300 pages long it can still be read and loved as a book. It will be a success to Ian Pugh for writing it and he can make more money to provide for his family if he writes more books like Wolfstorm. If he makes more books like that one he can be a world famous author for recommended 8-13 yrs books. His imagination about the characters and everything is just magnificent. Characters Spike, Charlie and Danny go into an awesome adventure in Germany where they meet Hitler and then they go and they get into a bad situation when they get caught by the time hogs and then they escape to the german headquarters and get hold of these futuristic bikes that fly and have cool gadgets, weapons and lasers. It sounds like a really cool**
